DIRECTIONS

Add one level scoop of Ultimate ProFIT to an 8 oz. glass of water, milk, juice, or blend in your favorite foods. When mixing, add liquid first, then the Ultimate ProFIT blend. Stir briskly until completely dissolved.

PRODUCT INFO

ULTIMATE PROFIT[®] {CREAMY VANILLA} ADVANCED SUPERFOOD NUTRITION

ULTIMATE PROFIT IS POWERED BY

- Sustain-It[™], a smarter protein blend for maximum bioavailability in every gram
- FITzyme[™], a cutting-edge blend of enzymes, helps maximize your body's ability to absorb Sustain-It[™]
- FITboost[™], an antioxidant blend of mood-elevating superfoods for immune system health
- Non-hormonal and Non-GMO whey and soy proteins
- Natural, whole-food ingredients with only 100 calories per serving

FREQUENTLY ASKED QUESTIONS

What makes Ultimate ProFIT better than other "protein" products on the market?

Ultimate ProFIT is not just a protein; it's a superfood nutrition product that gives you total body benefits that can improve your health and your waistline.

If your goals are to build a stronger, leaner figure, the superior protein blend in Ultimate ProFIT is proven to give you ultimate results. Ultimate ProFIT is powered by Sustain-It[™], a smarter protein blend of non-hormonal and Non-GMO whey and soy proteins that delivers maximum bioavailability in every gram, allowing you to nourish and build lean muscle mass, experience quicker post-workout recovery, and even maintain healthy cholesterol levels.

The Sustain-It[™] blend not only contains a superior protein blend, it also promotes optimum digestive health through its blend of seven different soluble and insoluble fibers.

FITzyme[™], a cutting-edge blend of enzymes, helps maximize your body's ability to absorb Sustain-It. (After all, what good is a load of protein if your body won't absorb it!) FITzyme[™] ensures that your body is able to absorb and utilize the maximum benefits from every gram of protein in Ultimate ProFIT.

The Ultimate ProFIT formula is made complete with the addition of FITboost[™], an antioxidant blend of superfoods that supports immune system health. With ingredients like cacao powder and maca, you'll also experience feel-good, mood-elevating energy.

What are BCAAs and why do they matter?

BCAAs replenish muscle glycogen stores, which are utilized during strenuous exercise. Ultimate ProFIT has been formulated with a remarkably high amount of BCAAs to support strength and power during exercise, encourage muscle growth, and promote faster post-workout recovery.

ADVANCED SUPERFOOD NUTRITION

FREQUENTLY ASKED QUESTIONS CONT.

Why does Ultimate ProFIT only have 14 grams of protein?

In short, the protein in Ultimate ProFIT has been formulated to ensure your body receives the maximum benefits from each gram of protein. While some protein products have high amounts of protein, more protein does not necessarily mean greater results. Your body can only absorb and use so much protein at a time.

The Sustain-It™ blend of proteins in Ultimate ProFIT is created through an advanced technology filtration process to ensure a high biological value (HBV) protein. This means that the body can assimilate each type of protein in Sustain-It at a different rate, driving muscle growth by extending the period of amino acid availability and nourishing the muscles over a longer period of time. Ultimate ProFIT combines the high quality protein in Sustain-It with the cutting edge blend of enzymes in FITzyme™ to ensure that your body is able to absorb and use each gram of protein. It's a more efficient way to nourish the muscles and with fewer calories!

What is the recommended serving of Ultimate ProFIT?

Add one level scoop to an 8 oz. glass of water, milk, juice, or blend into favorite foods. You can use it in shakes or smoothies or even bake with it!

When mixing, add liquid first, then the Ultimate ProFIT blend, stirring briskly until completely dissolved.

Will cooking with Ultimate ProFIT cause it to lose any of its nutritional properties?

Cooking can reduce the effectiveness of the whey protein in Ultimate ProFIT's Sustain-It blend. Whey protein is very heat sensitive, and high temperatures will render the proteins unusable for anabolic processes. While the whey protein is affected by cooking, the amino acids from the soy protein isolate will remain intact. Cooking or baking with Ultimate ProFIT is a delicious way to enjoy the superior blend of nutrients and non-whey proteins found in Ultimate ProFIT.

Is Ultimate ProFIT gluten free?

Yes, Ultimate ProFIT is a 100% gluten free product.

I lost my ultimate ProFIT scoop; what is one scoop equivalent to?

One Ultimate ProFIT scoop is 24 grams, the equivalent of between 1/3 and 1/4 cup.
